

Varma Infrared Heaters

The Varma Infrared Wall Mounted Heaters are suitable for total or supplementary heating of premises or zones. They are primarily used indoors in warehouses, churches or trade counters but can be used outdoors, for example in leisure areas that are protected from the weather.

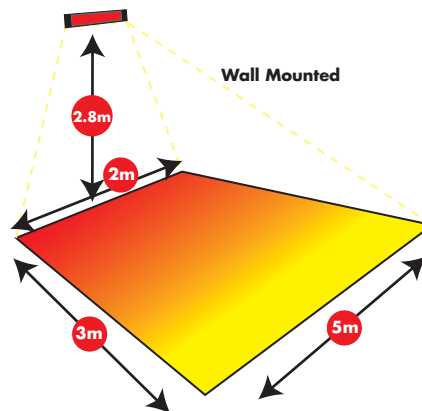

TECHNICAL SPECIFICATIONS

- 2KW and 4KW models available
- Energy efficient low energy costs
- Draught and Noise free
- Aluminium reflectors for optimal heat output
- Can be angled in different positions
- Robust industrial design
- Heaters can be controlled with appropriate controller
- IPX5 Protection
- Recommended mounting height 2.8m
- CE Compliant

See control options on Page 60

APPLICATIONS

- Warehouses
- Churches
- Industrial Premises
- Trade Counters
