## RECTANGULAR DUCTING

The choice of rectangular system depends on the air volume and speed at which the air is being expelled. The higher the volume and speed the bigger the duct needed. For extractor fans or low powered cooker hoods use Easi Vent 100. For whole house central extract systems or high powered cooker hoods use Easi Vent 204

	<b>Easi Vent 100</b> <b>110mm x 54mm</b>	<b>Easi Vent 204</b> <b>204mm x 60mm</b>	<b>Easi Vent 220</b> <b>220mm x 90mm</b>

## RECTANGULAR DUCTING

The choice of rectangular system depends on the air volume and speed at which the air is being expelled. The higher the volume and speed the bigger the duct needed. The extra slim profile of the Easi Vent 225 and 300 ranges is ideal for installation in ceiling voids with restricted height. For extractor fans or low powered cooker hoods use Easi Vent 225 or 300. If performance is of importance a larger system such as Easi Vent 204 should be used.

### Easi Vent 225 234mm x 29mm

### Easi Vent 300 310mm x 29mm
